Dearest friends, donors and supporters,

We are close to the end of the year 2016 and the wish of the family and foundation Fabrizio Meoni, as well as that of the missionaries, volunteers and the receivers of the humanitarian projects, is to thank all of you for the moral and material support. After 12 years from the sudden death of Fabrizio, the foundation has always tried to be like he was as far as rigor, seriousness and passion are concerned.

Castiglion Fiorentino, 12 November 2016

The maturity and the efficacy of our projects have grown year after year, because of the excellent

capacities of our partners, volunteers and clerics, as well as the reliable reputation and huge appreciation of a lot of friends for the **foundation Fabrizio Meoni ONLUS**.

It is certain that the figures of our balance sheet would make smile anybody who knows about the sums moved by the international cooperation, emergency situations and by all those mechanisms that monopolize huge cash flows allocated for poverty and underdevelopment, very often though, with opposite results from what had been expected. Despite this, there are thousands and thousands of people who benefit from our projects and that, because of the limited economic potential, understand the value of the money and the financed projects and feel responsible and stimulated to add any possible effort from their side in order to improve their conditions of life and their future.

Our way of operating rules out any occasional intervention or generic funding, as we are only

moved by the conscientious intent to support the continuity and the stability of the projects in the long term and first of all, those personally realized by Fabrizio, some of which are going to be almost 20 years old, and with the most recent one being the partnership in Ivory Coast with Don Pasquale Poggiali Mission started in 2011.

This year, struck by the brutal reality of the exploitation of women and under-age work for children who are 5/6 years old only, we have decided to finance schools and school related services (cafeteria, nursery school, elementary school) in Burkina-Faso in the Pissy Mine. A granite mine called "the devil's hole" because of the incredibly harsh work conditions of women.

Great satisfaction finally for the results of the renovations of the school "Fabrizio Meoni & Amici d'Italia in Dakar", that came back to a new life.

A special thank you to the protagonists of two special events which were held during the year: May 13th at the Naif

Prato, 13 May 2016

Discotheque in Prato where Franco Nannucci concluded a brilliant fund raising campaign and the music and theatre performance at the 'Comunale in Castiglion Fiorentino offered on November 11th by the groups "Doctors & Music" and "Little theatre from the city of Cortona".

We wish you and your families our best wishes for a Merry Christmas and Happy New Year

Il Presidente

Avv. Pierluigi Fabbri
