

## CONVERTIBLE TOP CARE & CLEANING TIPS

### To Keep Your Convertible Top Looking Its Best

Clean off all debris and have minor rips, leaks, and weak spots repaired ASAP - minor problems can turn into large issues quickly!

Follow factory recommendations for convertible top cleaning!

Do not use citrus, bleach, silicone or petroleum based products! These products break down a convertible top's resistance to water and in most cases will also void the factory warranty and promote the deterioration of factory seams and seals.

A mild, natural non-detergent based auto shampoo that does not contain a glossing agent is best for convertible top cleaning. Use only this type of product on the convertible top. The only cleaner recommended by the [Haartz Corporation](#) (the world's #1 manufacturer of convertible tops) is [Wolfstein's RaggTopp Cleaner](#).

Be sure to rinse thoroughly immediately after cleaning since any cleaners left on the top may fade the color!

Never take a convertible through an automatic car wash!

Caring for plastic convertible windows: never use paper towels or any household glass cleaners. The best option is a soft microfiber towel and cool water. Household glass cleaners will deteriorate the window, and could leave it spotty and prone to fogging!
